DIKSHITA PIMPALE

dikshitapimpale14@gmail.com | (+91) 9579418313 | linkedin.com/in/dikshita-pimpale | https://github.com/DikshitaP

SKILLS

- Java, HTML, CSS, JavaScript, Python, React.js, Node.js, Express.js.
- Canva, Figma, Git, GitHub.
- DBMS (PostgreSQL, MongoDB)
- Machine Learning and Data Analysis (EDA, Pandas, NumPy, Scikit-learn, Feature Engineering)
- Cloud and DevOps: AWS (Lambda, API Gateway, S3, IAM, CloudWatch), Serverless Architecture.

EDUCATION

- Information Technology | Vidyalankar Institute of Technology, Mumbai *CGPA: 9.6| 2027*
- XII (HSC) | E.S Andrades College of Science, Vasai *72.67%| 2023*
- X (SSC) | N.G. Vartak English Medium High School, Virar *95.20%| 2021*

EXPERIENCE

Cloud Engineering Intern| HEProAI **(11/2025 - 01/2026)**

Designed and deployed a serverless web application on AWS using Lambda, API Gateway, and S3. Developed backend logic in Python, implemented RESTful APIs, configured IAM roles for secure access control, and monitored performance using CloudWatch, ensuring scalability and cloud-native best practices.

Web Development Intern| Octanet Services Pvt. Ltd. **(01/2025 - 02/2025)**

Created dynamic webpages for the firm, also indulged in conversations with the team. - HTML, CSS, JavaScript, Canva, MongoDB.

ACADEMIC PROJECTS

- **WellNexus-** Student Mental Health & Well-being System.
  - Developed a full-stack web platform using React, Node.js, and MongoDB to monitor student mental health and provide proactive well-being support.
  - Implemented features such as mental health tracking, personalized recommendations, counsellor connectivity, etc. to assist students in managing stress and preventing depression.
- **CropNetix-** Crop Lodging Detection System
  - Developed a deep learning-based system using MobileNetV2 and Grad-CAM++ to detect crop lodging, achieving ~96% accuracy through optimized training and preprocessing.
  - Built a full-stack solution with React and Fast API to display lodging percentage, Grad-CAM visualizations, and crop recovery recommendations.
- **ML based heart disease prediction system**
  - Performed data preprocessing, feature selection, and Exploratory Data Analysis (EDA) to identify key risk factors.
  - Achieved accurate predictions using Logistic Regression

POSITION OF RESPONSIBILITY

- **Cultural Council | Student Council, VIT (Mumbai)** **(07/2024 - 05/2025)**
  - Served as a Core Member, appointed as Event Head for multiple college events. Responsible for planning, coordination, and smooth execution of activities with cross- team collaboration.
- **Voluntary Community Service | Human team foundation**
  - Volunteered for education enrichment, environmental stewardship, humanitarian outreach and community engagement

CERTIFICATIONS

- I have achieved certifications in many domains including ML in python from L&T STA, Mern Stack, Full Stack from Udemy DBMS from scaler, etc. Drive link: https://drive.google.com/drive/folders/1DrATL-mCjBWXJvFlJ0oBaAA5U4MR7NvO
